Exciting Changes

Ontario Office Works Inc. has been delivering the SEB program since 1995. During that time we have tried to respond to client needs and requests. Feedback from you has shown a continuing theme .. "software is so very expensive...we want to "try it before we buy it"..we need a place to escape the house and research without distractions while having help available if we need it...I want to see it! Photocopies and faxing is a problem. I want to look on the Internet but I don't know what I am looking for!"

Our goal has been to create a learning environment, a place that people feel welcome to conduct research, to get help with an admin or marketing project, to investigate software and technology. Ontario Office Works Inc can now provide that environment.

To Better Serve You

We now can provide you with *free photocopies and faxing!* (Limited quantities)

Our *WEB Site* is up and dancing! The SEB section has a place for "success stories." If you have been off the program for at least 3 months and want to be placed on this page, give us a call. We will take digital pictures of you, your sign, products etc. and feature your business. The latest seminar schedule will be posted on this site. We will also be advertising the site address at job fairs, in newspapers and on all of our brochures.

The *Welland training room* has new equipment to better serve your needs. The laptop can be hooked to the TV and you can see the computer presentations on the TV screen. You can also view videos and listen to audio cassettes in the training room. *Advertise* by placing your business cards and brochures on the special display rack.

A *computer training room* with an Internet connection is available. This computer also has all the business software you may wish to research.

The *library* is being expanded. We have categories on [business plans](#), [research \(for business plans and for company expansion\)](#), [computer software](#), [marketing](#), [government regulations](#), [government services and continuing education](#).
